

A Movement estimate from frozen features

Expanded summary; higher source-balanced R^2 is better

Initial encoder

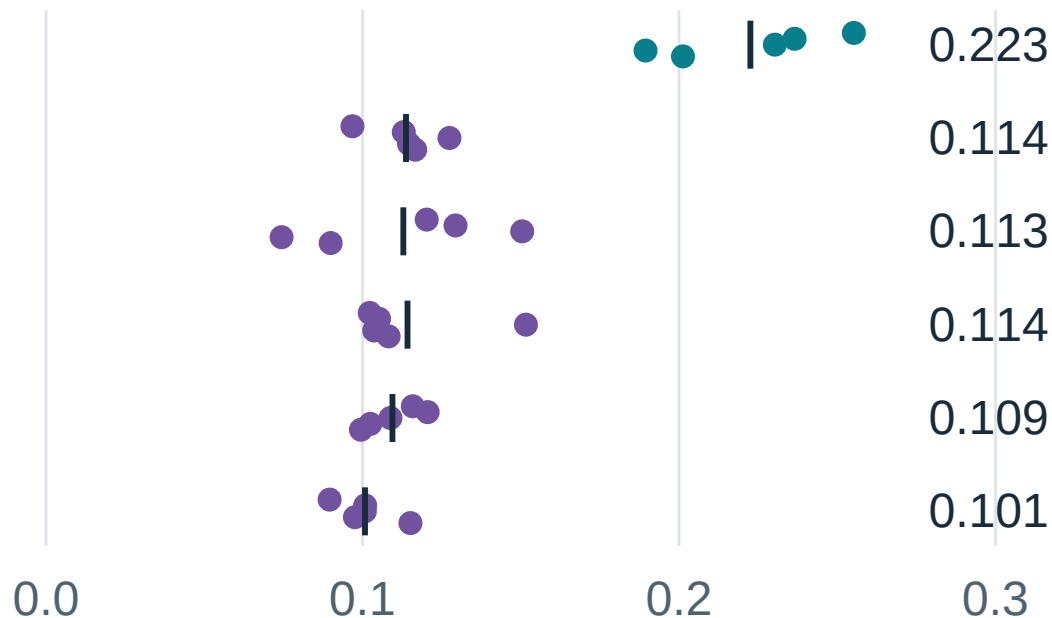

Random: motion

MAMP-style

Motion mixture

Random: region

Connected region

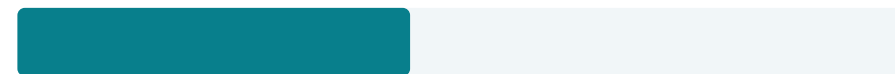

Dots: five seeds. Tick: mean. Same 93 videos.

B Hidden-feature matching

Correct clip beats another source

Initial

33/75 checks

Trained

375/375 checks

Counts summarize repeated model checks; they are not independent experiments.

Neither panel evaluates future movement.
