

Restoration is not the same as response recovery

All eight fitted families and both readout objectives; smaller errors are better

● Coordinates △ Original change package ... Zero response: 5.81°

14 development people × 3 seeds; hierarchical means. A-B: point estimates. C: exploratory paired 95% intervals. Failures retained at 720° (response) / 180° (trajectory). Positive C means the original change package worsens error.
